David Griffiths: Introduction to Electrodynamics. Here are my solutions to various problems in David J. Griffiths's textbook Introduction to Electrodynamics, Third Edition. Obviously I can't offer any guarantee that all the solutions are actually correct, but I've given them my best shot. These solutions are the only ones that I've worked out so far, so please don't ask me to post "the rest of ..."

A nice collection of problems. Some of the solutions are formal, not much intuition is provided, so the book can help with the math, but not with physics learning! Out of 10 problems I picked (while teaching a course based on D. Griffiths, 2nd half) two had major mistakes:

Our intention for the site is plain and simple: provide electrodynamic problems with solutions. We hope that the information may help one or the other to understand photonics. We believe that the best way to achieve this is to solve problems and have their solutions at hand. We also take the chance to supply additional information in the background section for most of the problems.
