Example Of Age Problem With Solution

Tom's father. Phil is 35 years old. Three years ago, Phil was four times as old as his son was then. How old is Tom now? First, circle what it is you must ultimately find— how old is Tom now? Therefore, let t be Tom's age now. Then three years ago, Tom's age would be $t - 3$. Four times Tom's age three years ago would be $4(t - 3)$. Phil's age three years ago would
